**ELEMENTS OF
INTERVENTION**

A Social Enterprise

EOI

In an effort to streamline our workforce development programming for our most vulnerable youth, ASK's founder, Natasha Brown, developed a social enterprise entitled Elements of Intervention (**EOI**).

Programmatic services for EOI include:

- Academic Enrichment Tutoring
- Individual & Family Counseling
- Character Development Workshops
- Life & Employability Skills
- Conflict Resolution & Anger Management

- In collaboration with other providers and local sponsors, EOI
- will provide nutritional meals and snacks to youth during programming hours. When possible, EOI will provide food baskets for their families

EOI's individualized supportive services programming not only focuses on increasing at-risk youth's independence but fosters the foundation for academic mobility and economic viability within the community. Through our emphasis on academic success, short-term employment goals, workforce stability, and mental health support, EOI helps our participants develop strategies and tools to work towards a safe, stable and independent living when needed.

ABOUT US

A program designed to accommodate children, youth, and families by providing services such as Mentorship/Supervision, Counseling Services, Educational Tool, Transitional/ Recovery, and Dropout Prevention.

EOI's focus is to invest in the youth and families within Hillsborough County and motivate them through empowerment, advocacy, support and to provide meaningful opportunities and build life skills.
